

WHAT IS **ICON** EMERGE?

Educate, Mold, and Grow

Learning the necessary skills to design and build a building are important parts of becoming an architect, as are leadership, collaboration, and teamwork. At ICON your experience extends beyond the drawing set and puts you in the meetings, on the job site, and in the design discussions to help you learn all of the skills necessary to welcome an architect and a project manager.

Endow

As a company, we are committed to investing in all aspects of your licensure process, from affording you opportunities to experience all phases of a project, to time to study and take exams, to funds for resources, fees, and memberships. ICON is invested in seeing you succeed.

Refine

Your previous experiences make you who you are, a unique individual that we want on our team. ICON believes our varied backgrounds make us better designers so we strive to build on those foundations when training employees in our processes and standards. Our goal is to refine the skills you already have and embrace the perspective you bring to the team.

Engage

At ICON, we believe in access and transparency. As a professional on path to licensure, you will be engaged not only with your immediate teammates and collaborators, but with all levels of leadership in our firm. From our founders and principals, to project architects, designers and project technicians, every member of our team works together to achieve our client's goals. Beyond the office, we are also engaged in organizations and groups that make us better architects, better employees, and better people.

ICON Emerge is a program developed by ICON Architectural Group to support our designers on their path to licensure and aid them in navigating the requirements needed to become a licensed architect. Beginning with your new-hire orientation, you will be immersed in a process designed to give you every advantage possible in order to complete your experience and exam requirements and become a qualified architect.

ICON Emerge was created to combine all of the resources ICON has to offer and provide the support and encouragement needed to navigate the licensure process. ICON Emerge provides the tools to make becoming an architect simpler and more attainable for new employees. ICON has a proven track record of producing quality architects at a rate far quicker than the national average. Broken into four principles, ICON Emerge is set up to provide you with everything necessary to succeed and accomplish your goals.

“As an intern, you are at a very exhilarating juncture.

Interns have an indulgence of theoretical process and intent through their academics. Recognizing this at ICON, we provide an abundance of opportunity for our interns to apply it within our studio setting. We are eager to see new ideas, their knowledge, their creativity and their energy.

By maintaining a dialog, we engage those ideas and work collaboratively in a creative process towards a solution. We want them to gain an experience that not only helps them grow their career, but also an ability to further apply it in their academics. Our internship program outlines a path for them to create their own destiny. With their knowledge, passion and self-motivation, opportunities will emerge.”

Tom Wesley, AIA, NCARB, LEED-AP
Principal Architect, Team Lead
